

JOHNS HOPKINS DRUG DISCOVERY

JHDD Post-Doctoral Fellowship Announcement

Biochemistry Post Doc Position Available

Postdoctoral position in biochemistry is available at the Johns Hopkins Drug Discovery (JHDD) program. The candidate will work on a multidisciplinary drug discovery team to identify and characterize small molecules as potential therapeutic agents for cancer and neurological diseases. JHDD will provide a dynamic research environment including interactions with JHU faculty, medicinal chemists, biochemists, cell biologists and *in vivo* pharmacologists. *Requirements for the position include:*

- A Ph.D. degree in biochemistry, cell biology, pharmacology or related field
- Knowledge of enzymology, receptor pharmacology, molecular biology, cell biology, cancer and/or neuroscience a plus
- Ability to perform effectively in a team environment
- Good oral communication and writing skills

**Salaries commensurate with
NIH Standards*

JHDD was created with the mission of identifying novel drug targets arising from JHU faculty's research and translating them into new drug therapies for disease including cancer and neurological disorders.

JHDD staff has expertise in the conduct of preclinical studies, including assay development, DMPK, medicinal chemistry, animal pharmacology, and the knowledge necessary to bring novel drugs to the clinic.
